HW10: Chrome Dev Tools

Message Logging

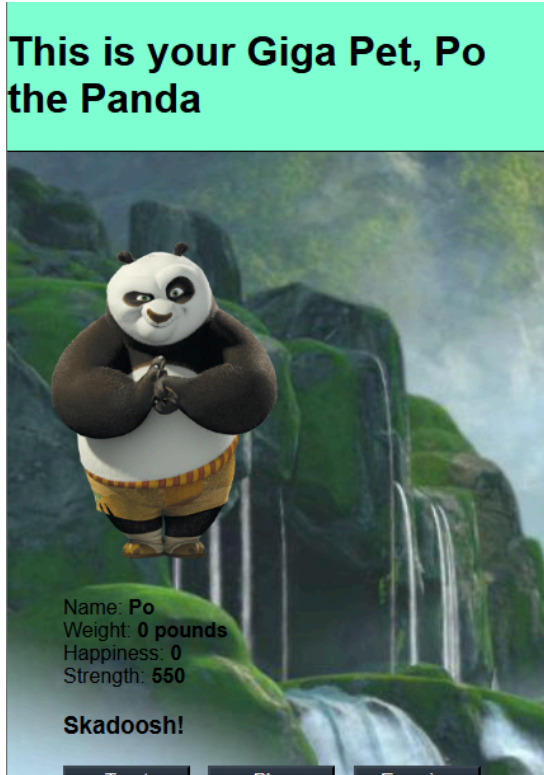

- **Log Info:** Added `console.log()` functions for each button to log that the button got clicked

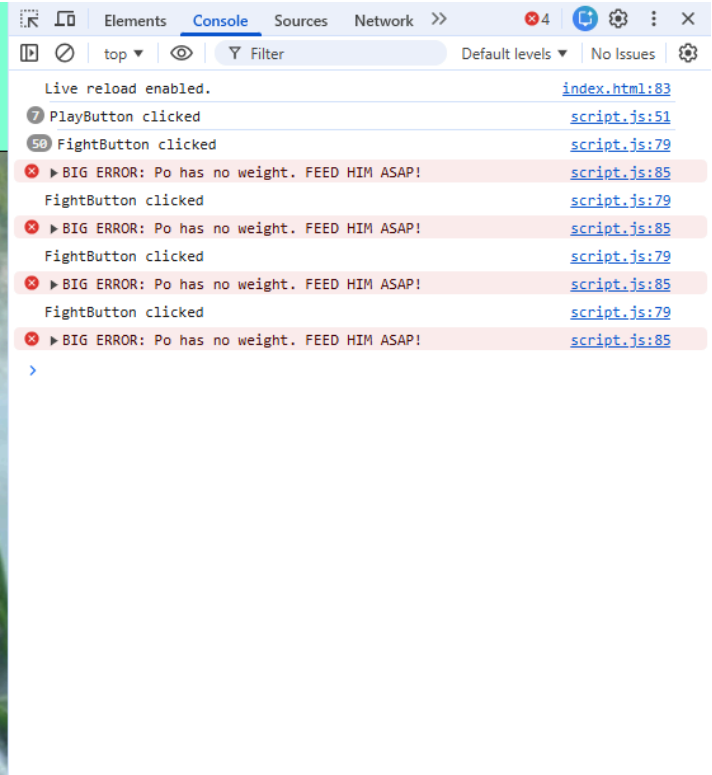

- **Log Warning:** added `console.warn()` to warn users when Po is full (max weight is 400 lb, so when weight ≥ 400 , warning pops up)

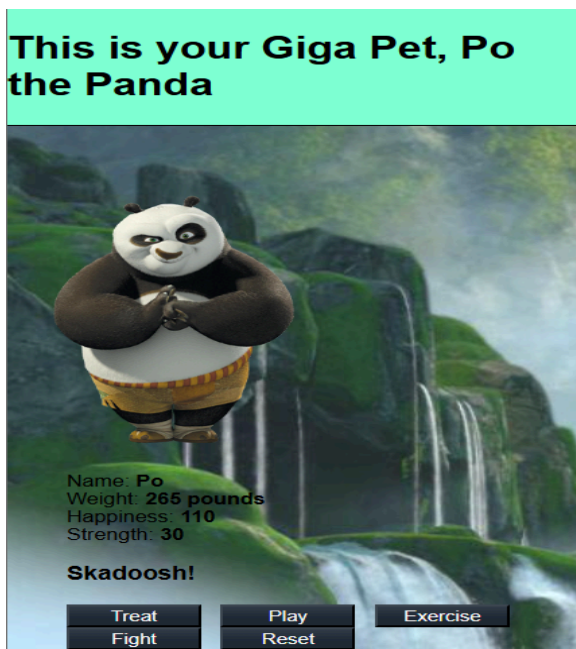

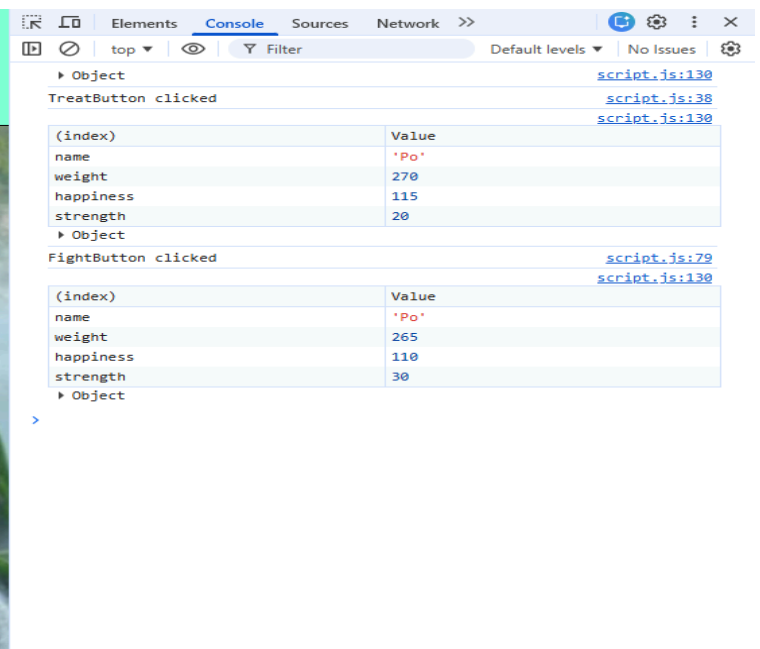

- **Log Error:** added `console.error()` for when Po's weight is at 0 (weights at 0 he's basically dead so, very bad). Added for all buttons except treat and reset

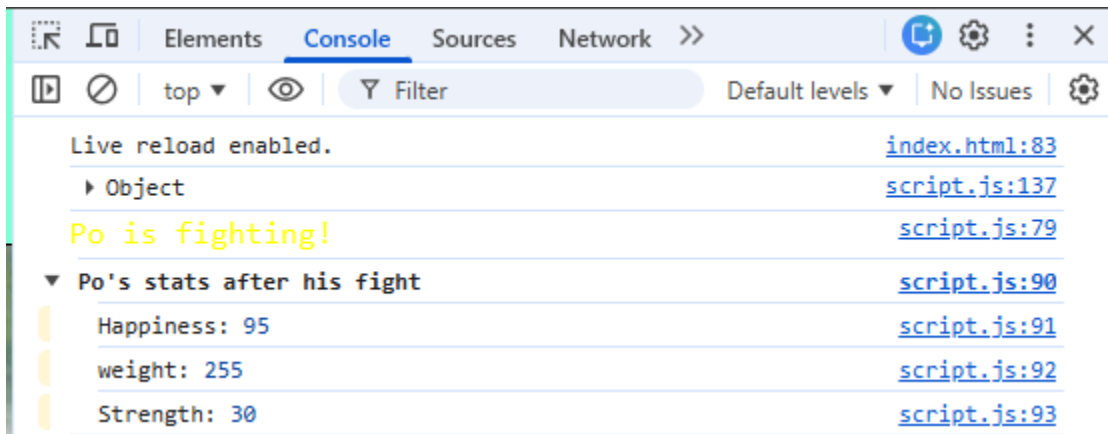

- **Log Table:** added `console.table()` function to `updatePetInfoInHtml()` to show a table of the Po's updated stats after every click

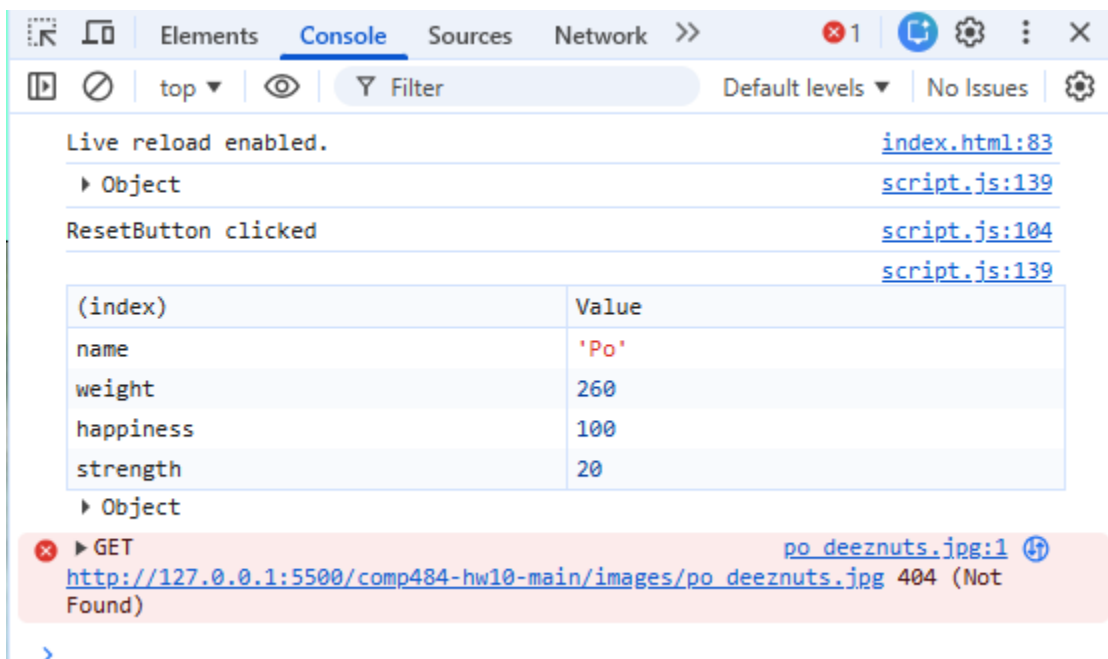

- **Log Group and Custom:** custom log message for when Po is fighting and log group for his stats after fighting

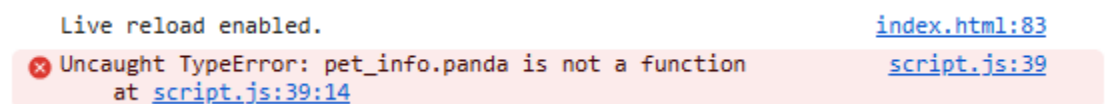

View Messages Logged By the Browser

- **Cause 404 network error:** added an image source that didn't exist to the reset button, which caused a 404 network error

- **Cause TypeError:** made an undefined function “pet_info.panda”

- **Cause Violation:** play button freezes for like 4 seconds

Interaction to Next Paint (INP)
?

4,016 ms

Your local INP value of 4,016 ms is poor.

INP interaction [pointer](#)

[Learn more about local and field metrics](#)

Interactions	Layout shifts	
▶ pointer	main	0 ms
▶ pointer	button.play-button	32 ms
▶ pointer INP	button.play-button	4,016 ms

Filter Messages

- **Filter by log level:** shows only warnings and errors

Reproduce a Bug: the same as cause Error 404, the bug is that the directory for the image to show up when clicking the reset button does not exist

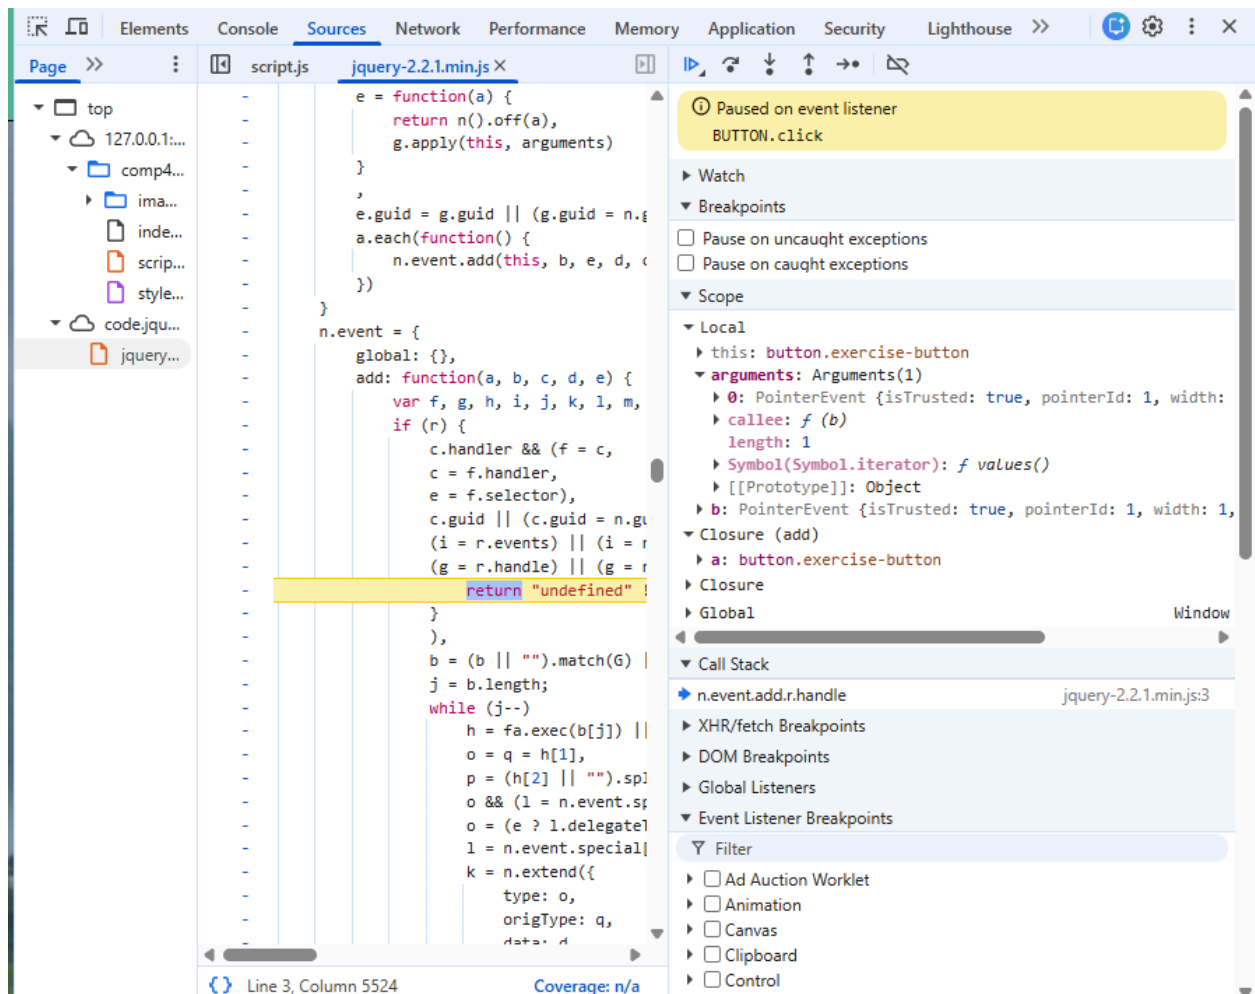

Get Familiar with Sources UI

Pause Code with Breakpoint: paused code with breakpoint whenever a button is clicked

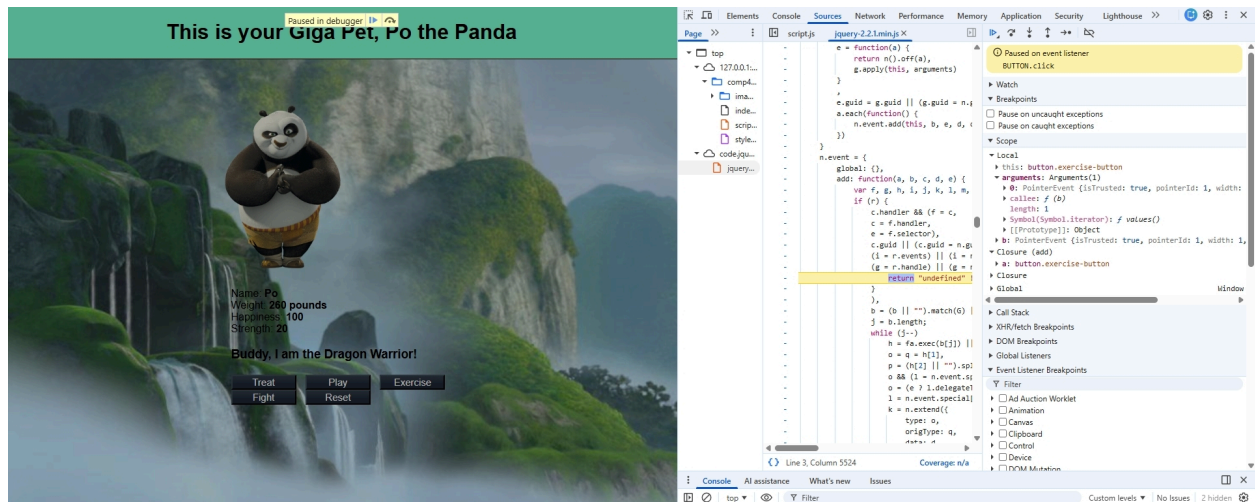

Set a line of code breakpoint

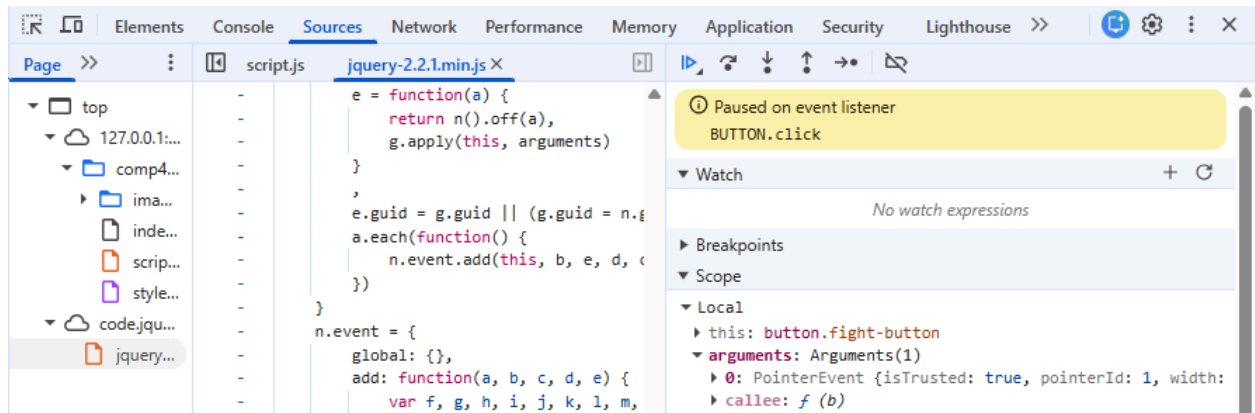

Check variable values,

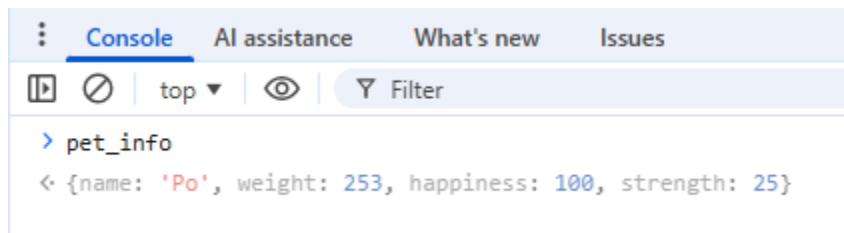

- The Scope Pane: scope pane selected off the source tab

- Watch Expressions,

- The Console,

Fix Bug: commented out the incorrect image directory, and added an image directory for the default image of Po

```
document.querySelector(".reset-button").addEventListener("click", () => {
  //showTempImg("images/po_deeznuts.jpg", 2000)
  showTempImg("img/po_default.png", 2000)
})
```
